

Dear colleague,

The Finnish Psychiatric Association, in co-operation with the Nordic Psychiatric Associations, is organizing the 33rd Nordic Congress of Psychiatry, NCP2021 Virtual, on June 17th - 18th, 2021. The congress, organized every third year in a Nordic or Baltic country, is an esteemed international scientific psychiatric congress, connecting professionals especially from the Nordic and Baltic countries. The congress will be organized on a virtual platform, allowing for safe and easy participation from all around the World. Our congress slogan "Connecting Minds" is now more timely than ever.

Our scientific program consists of top-quality plenary lectures and symposia. The topics of the plenary lectures by world-renowned speakers range from the genetics of psychiatric traits to RCTs related to improving treatment of psychotic illnesses and from the brain basis of social interaction to the future of psychotherapy, not forgetting adolescent mental health issues and public health needs and responses in the context of COVID-19. You can view our preliminary program on our webpage: www.ncp2021.fi.

The registration is now open! Please make sure to take advantage of our early bird fee, available until April 18th, 2021. Submission of abstracts is open until the end of February. All accepted abstracts will be published in a supplementary issue of the Nordic Journal of Psychiatry. The whole congress program will be recorded and available afterwards to all participants for up to 1 month after the congress without additional fees.

You are most warmly welcome!
